

News Release Date: Sept 16, 2013

Emprog announces full support for STMicroelectronics STM32 ARM/Cortex family of MCUs.

Silicon Valley, CA – September 16, 2013 – Emprog ThunderBench™ C/C++ development tool suite, along with its ecosystem, is now available with full support for the STMicroelectronics STM32 ARM® Cortex™ product families.

Emprog <u>ThunderBench</u> is a complete C/C++ development tool, which offers customers all that they need to complete their STM32 ARM/Cortex development project. It includes a C/C++ compiler, IDE, debugger, linker, libraries, and many ready-to-use BSPs for ST's boards and kits. ThunderBench is supported by Emprog's experienced and highly qualified technical support team.

"Our experience with Emprog ThunderBench as a proven development tool is in line with what we like to offer to our customers," said Tony Keirouz, Vice President Marketing and Applications, STMicroelectronics' Americas Region. "Our tool eco-system is an important part of our success and we're happy that Emprog's tool now strengthens our STM32 microcontroller ecosystem."

In addition, ThunderBench for STM32 provides highly optimized compilation and build tools with extensive debugging and analysis possibilities such as complex structure breakpoints, stack performance report and many more.

"We are encouraged to be working with STMicroelectronics to ensure that Emprog
ThunderBench is an effective and value-add tool for STM32 users," said Dan Augustine,
Marketing Manager at Emprog. "Our commitment to the embedded-system tools and solutions
market is our major strength and we're happy to extend our commitment to ST's customers."

About Emprog ThunderBench for ARM/Cortex

ThunderBench for ARM/Cortex is a comprehensive integrated tool that combines a C/C++ compiler, a debugger and an IDE within the Eclipse platform supporting any 32-bit ARM/Cortex device. The integration and the fine crafting of the Eclipse platform offered by Emprog ThunderBench not only removes the age-old gap between 'proprietary' and 'open technology' tools; it goes far beyond. With the introduction of project creation wizards and ThunderCloud for up-to-date BSPs, Emprog ThunderBench is second to none in offering complete 'out of the box' development solutions for embedded systems.

About Emprog

Emprog is a provider of enhanced integration of standard development tools for Embedded programming. The company's flagship product ThunderBench has the best deployment of any Eclipse IDE platform. ThunderBench for ARM enables thousands of engineers to develop their products using high performance 32-bit Cortex/ARM devices in several industry areas such as medical, consumer electronics, automotive, wireless, LED, and telecom. A wide range of partners and middleware vendors are supporting ThunderBench via Eclipse plugin capabilities. For more information visit www.emprog.com.
